Mitja Kramberger *Engineering Manager*

mitja.kramberger@gmail.com • github.com/mkramb

Summary

I'm a methodical, quality focused full stack software developer who specialises in front-end web app, hybrid app, and RESTful API development. Experienced and highly proficient in platform architecting, highly versed in agile development practices and delivering high quality maintainable tested code. In addition, I possess excellent communication and client-facing skills. I have also held tech leading positions and executed my roles successfully, working well under pressure, results driven.

Highlights

- **Front-end expertise** Optimizing UX for scale, reactive patterns using RxJS, advance state management, advanced React (e.g. implementing a custom React renderer) and Angular, desktop container technologies (e.g. OpenFin, Finsemble).
- **DevOps and Agile** I have enabled workflows that would normally take hours to run, to run in under a minute, using cloud services and improving build tools across the organisation.

Experience

PrimaryBid — London, United Kingdom
Principal Engineer *Oct '21 – Present*
- Leading the development of the internal Asset Ledger system.
- Working on Reliability & Observability across engineering.

Checkout.com — London, United Kingdom
Senior Engineering Manager *May '20 – Oct '21*
- Managing multiple teams in the Ecommerce Platform space, reporting directly to CTO.
- Leading the development of internal Middleware API which is the foundation for all APM integrations.

Photobox — London, United Kingdom
Principal Engineer *Apr '19 – Apr '20*
- Lead implementation of the Photobox Editor experience and advised on technical direction across the group.
- Onboarded a new team of contributors and introduced modern software engineering practices.

Cloudbees — London, United Kingdom
Senior Engineer *Jun '18 – Apr '19*
- Lead the UI implementation for internal product kubeCD, which is now official addon for JenkinsX.
- Authored Component library based on internal styleguide Shipyard.

JPMorgan Chase & Co. — London, United Kingdom
VP Consultant *Oct '17 – May '18*
- Advised on the technical direction for our UX components and improvements to our internal UI library.
- Authored DevOps pipeline (kubernetes), which allowed feature builds and simplified deployment process.

Lab49 — London, United Kingdom
Senior Consultant *May '17 – Oct '17*
- Lead UI implementation for internal MIFID2 project.
- Worked on complex UI components and integrations with ION platform.

Sapient Global Markets — London, United Kingdom
Manager Interactive Development *Aug '16 – May '17*
- Authored development of internal web accelerator, which helped engineers starting a new project.
- Worked on PSD2 directive implementation for Lloyds at their Payments team, as a technical lead.

Lloyds Banking Group — London, United Kingdom
Technical Lead *Apr '16 – Aug '16*
- Lead multiple UI focused teams, maintaining their build pipelines and supporting group Agile environment.
- Contributed to Lloyds skeleton app (initial code for all UI projects) and global UI Components library.

Sky — London, United Kingdom
Senior Engineer *Jun '15 – Apr '16*
- Lead delivery for Sky Go desktop app.
- Advocated for technology excellence and ensuring that we follow the best practice.

Atlassian Software Systems — Sydney, Australia
Senior Engineer *Sep '13 – May '15*
- Lead UI implementation of industry leading CI/CD server, Atlassian Bamboo.
- Ensuring we followed UI best practices and acted as a feature lead (across the whole technical stack).
